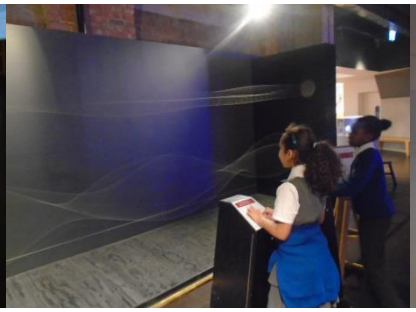
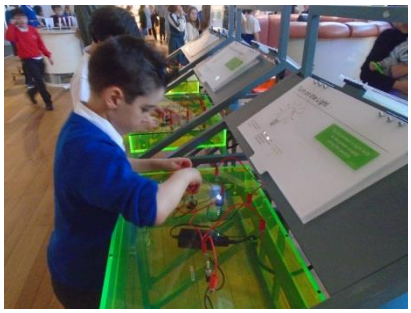
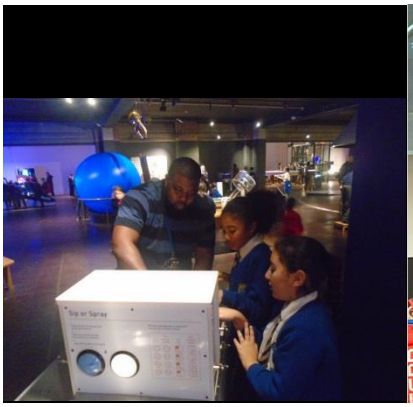
# Science Museum Trip 7.12.18

To further our knowledge of forces Year 5 were lucky enough to visit the Science Museum on Friday 7th December 2018.



First we explored the Wonder Lab where there were many examples of forces in action which included children pulling themselves up using their hands and a chair. Spinning around on a moving ball bearing – this would speed up or down depending on how you distributed your weight and many other activities.





The children then went on to watch the Forces show; whose main star was Phil Pond (frog!) They watched a range of experiments and learnt some new information regarding forces.

Congratulations on a fantastic first term in Year 5 Centaurs!

Have an amazing Winter Break and a very Happy New Year,

From Miss Dahdouh.
