Oxford Gardens Online Safety Policy

Communication:

The policy will be communicated to staff/pupils/community in the following ways:

Policy to be posted on the school website and Staff Shared Drive. Policy to be part of school induction pack for new staff.

Regular updates and training on online safety for all staff.

Acceptable use agreements discussed with staff and pupils at the start of each year. Acceptable use agreements to be issued to whole school community, on entry to the school.

Handling Incidents:

The school will take all reasonable precautions to ensure online safety.

Staff and pupils are given information about infringements in use and possible sanctions.

DSLs act as first point of contact for any incident.

Any suspected online risk or infringement is reported to DSLs that day

Any concern about staff misuse is always referred directly to the Headteacher, unless the concern is about the Headteacher in which case the complaint is referred to the Chair of Governors and the LADO (Local Authority's Designated Officer).

Handling a sexting / nude selfie incident:

[UKCCIS "Sexting in schools and colleges"](#) should be used. This extract gives the initial actions that should be taken:

There should always be an initial review meeting, led by the DSLs. This should consider the initial evidence and aim to establish:

Whether there is an immediate risk to a young person or young people *When assessing the risks the following should be considered:*

- Why was the imagery shared? Was the young person coerced or put under pressure to produce the imagery?
- Who has shared the imagery? Where has the imagery been shared? Was it shared and received with the knowledge of the pupil in the imagery?
- Are there any adults involved in the sharing of imagery?
- What is the impact on the pupils involved?
- Do the pupils involved have additional vulnerabilities?

Oxford Gardens Online Safety Policy

- Does the young person understand consent?
- Has the young person taken part in this kind of activity before?

If a referral should be made to the police and/or children's social care

If it is necessary to view the imagery in order to safeguard the young person – in most cases, imagery should not be viewed

What further information is required to decide on the best response

Whether the imagery has been shared widely and via what services and/or platforms. This may be unknown.

Whether immediate action should be taken to delete or remove images from devices or online services

Any relevant facts about the young people involved which would influence risk assessment

If there is a need to contact another school, college, setting or individual

Whether to contact parents or carers of the pupils involved - in most cases parents should be involved

An immediate referral to police and/or children's social care should be made if at this initial stage:

1. The incident involves an adult
2. There is reason to believe that a young person has been coerced, blackmailed or groomed, or if there are concerns about their capacity to consent (for example owing to special educational needs)
3. What you know about the imagery suggests the content depicts sexual acts which are unusual for the young person's developmental stage, or are violent
4. The imagery involves sexual acts and any pupil in the imagery is under 13
5. You have reason to believe a pupil or pupil is at immediate risk of harm owing to the sharing of the imagery, for example, the young person is presenting as suicidal or self-harming

If none of the above apply, then a school may decide to respond to the incident without involving the police or children's social care (a school can choose to escalate the incident at any time if further information/concerns come to light).

The decision to respond to the incident without involving the police or children's social care would be made in cases when the DSL is confident that they have enough information to assess the risks to pupils involved and the risks can be managed within the school's pastoral support and disciplinary framework and if appropriate local network of support.
